Experiences

Software Engineer

May 2016 - August 2016

Hackmates @ Princeton University's eLab Accelerator

- Created models for a database incorporating user profiles, teams, and hackathons to generate a platform allowing users to create teams for hackathons
- Set up hosting using AWS Elastic Beanstalk, served static files using S3, and hosted site database on RDS
- Performed load balance testing on website to test up to 10k users with Locust, a Python library
- Conceptualized user login process flow and emphasized utilizing wireframes

Officer and Hackathon Organizer

May 2016 - Present

UMBCHackers and HackUMBC

- Attended over 15+ hackathons with other UMBCHackers,
- Reached out to 50+ corporate companies for hackathon sponsorship and raised \$2.5k in funding
- Generated 6 club workshops teaching HTML, CSS, Javascript, git, and Flask

CODE2040 Campus Ambassador

March 2016 - Present

- Informed, encouraged, and mentored more than 20 minority students to apply to tech jobs
- Guiding 2 minority applicants through the technical portions of applications

Software Engineer Intern

Jan 2016 - Feb 2016

InfoTeK

- Developed file system upload for 500 users using Google Web Toolkit
- Improved website security by using HTTPS protocol

Projects

Kindrone | Third Place Hack

Dragon Hacks @ Drexel University

- Developed a program in C# with Visual Basic that used the Kinect sensors to communicate with an AR.Drone using the KinectSDK and ARDroneSDK. This let you control the drone with hand gestures.

Major Way | Best Education Hack

Hoya Hacks @ Georgetown University

- Created a website application in Flask that takes in an uploaded four-year major curriculum and returns a graph of the most relevant subtopics in the major using natural language processing. Front-end design was completed using JQuery and Bootstrap.

Education

B.Sc: Computer Science, Mathematics

2014 - 2018

University of Maryland, Baltimore County | Major GPA 3.11
